

GET THE FACTS

OVERVIEW OF VENUES

City for Champions is a collection of four unique and extraordinary venues that will attract new visitors to Colorado Springs, the surrounding region and the State of Colorado.

THE UNITED STATES OLYMPIC MUSEUM

With iconic architecture, the United States Olympic Museum and Hall of Fame, located in the heart of downtown Colorado Springs, will embody the values, history and experience of the Olympic and Paralympic Games, honor outstanding athletes and host special events. The only one like it in the United States, the Museum will be a pilgrimage site containing artifacts, multi-media and advanced technology conveying the effort and excitement of becoming an Olympic or Paralympic competitor.

THE COLORADO SPORTS AND EVENT CENTER

Adjacent to the Olympic Museum, the Colorado Sports and Event Center, a world-class multi-use indoor and outdoor sporting venue, will be designed to host professional and amateur sporting events such as competitions, qualifiers and trials. The 10,000-seat outdoor venue can accommodate long field competitions, while the indoor venue will be flexible, configuring to accommodate hard-court sports.

THE SPORTS MEDICINE AND PERFORMANCE CENTER

Located within the Health and Wellness Village at the University of Colorado Colorado Springs, the Sports Medicine and Performance Center will be a nationally renowned destination for elite athlete clinical, testing and counseling services and related university research and education. A national institute of sports medicine is central to furthering the goals of elite amateur and professional athletic organizations throughout the United States.

THE GATEWAY VISITOR CENTER AT THE UNITED STATES AIR FORCE ACADEMY

A new facility, the Gateway Visitor Center at the United States Air Force Academy, will create an experience like no other as visitors are physically, intellectually and emotionally connected with the cadet experience and the history of the United States Air Force Academy. The Gateway Visitor Center will increase visibility and accessibility to the most visited military service academy in the nation, repositioning the Air Force Academy as Colorado's most visited man-made attraction.

Collectively, City for Champions leverages and elevates the U.S. Olympic movement, the University of Colorado Colorado Springs, and the United States Air Force Academy to become a long-term economic platform for the region and the state.
